### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric Raciti on April 6, 2005.

On line 3 of claim 46, the word "said" was deleted.

On line 6 of claim 58, the phrase "the calculated analyte concentration value" was changed to --a calculated analyte concentration value--. On line 7 of claim 58, the designation "YN" was changed to -Y'--, and the phrase "the temperature-corrected analyte concentration value" was changed to --a temperature-corrected analyte concentration value--.

On line 5 of claim 59, the phrase "the calculated analyte concentration value" was changed to --a calculated analyte concentration value--. On line 6 of claim 59, the designation "YN" was changed to -Y'--, and the phrase "the temperature-corrected analyte concentration value" was changed to --a temperature-corrected analyte concentration value--.

Lines 3-5 of claim 60 were deleted and replaced by the following phrase: --calculate a value X, wherein the value X is provided by taking a predetermined number of current measurements ( $m_1 \dots m_M$ ), averaging every n current measurement to provide a plurality of data points ( $d_1 \dots d_N$ ), and then averaging together the data points--.

Art Unit: 1743

2. The following is an examiner's statement of reasons for allowance: Application serial no. 10/706,663 is being allowed since none of the prior art of record teaches or fairly suggests a removable data storage device for use with a meter having a microprocessor and a meter memory containing machine language instructions therein, wherein the meter receives both the removable data storage device and test strips at different locations on the meter and wherein the removable data storage device comprises a carrier having a circuit board thereon, both a ground electrical contact and at least one voltage supply electrical contact on the circuit board, and a nonvolatile memory device storing data for use by the meter, whereby when the removable data storage device is connected to the meter at a location different from where test strips are connected, the ground contact becomes electrically connected to the meter before the at least one voltage supply contact so that the data from the storage device is uploaded from the nonvolatile memory into the meter memory for subsequent use by the machine language instructions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1743

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maureen M. Wallenhorst whose telephone number is 571-272-1266. The examiner can normally be reached on Monday-Wednesday from 6:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden, can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
